

> Windows Vista Testing

Does your product work on Vista?

Windows Vista is the name of the next generation and soon-to-be available Microsoft Windows Operating System release to follow Windows XP. The most noticeable change from Windows XP to Vista is its significantly redesigned user interface, which stands for "authentic, energetic, reflective and open." End-users may encounter compatibility problems when using their current product on a new Operating System (OS). In order to prevent such an incident and guarantee compatibility, Bureau Veritas-Allion is your natural choice of solutions partner.

Frequent Problems Encountered on "Vista"

- System detects an "unknown device"
- Cannot work on power saving mode
- System format issue
- The file cannot be copied from USB flash drive to the system
- The system cannot execute U3 function under Windows Vista
- Driver cannot be installed
- Bundled application do not work and display blank
- System cannot detect all memory slots
- Many, many more.....

Our solutions help you avoid Vista problems: Functionality Scan Test

For a quick turn-around time and cost effective rate, Bureau Veritas-Allion will perform a series of tests to help determine if your product meets the basic criteria under Windows Vista and that it functions properly with other hardware and software.

- Easy-to-understand information regarding your product and Vista compatibility
- Independent Test Report to back up your product claim with Vista
- Fast and expedient testing schedule
- Small test rate for greater services
- In the event of failure, we offer an expert debug service to help you achieve your market release date

Microsoft "Designed for Windows" Logo Program

Once products have been certified, a variety of marketing and distribution benefits will be made available to you. Bureau Veritas-Allion can help manufacturers to obtain the logo in the most efficient way. Moreover, your brand image can also be protected as well as the product's quality assurance.

- Enhance and deliver greater value from your products
- Provide an opportunity to differentiate your products in the market segment
- Increase customer confidence and satisfaction while purchasing Vista products

About Bureau Veritas-Allion

The Allion laboratory was established in Taiwan over 15 years ago and in 2005 formed an alliance with Bureau Veritas. Bureau Veritas-Allion is dedicated to the verification of computers, operating systems and peripherals and their associated interoperability. The service offered can either be a bespoke customer requirement, a turnkey plug & play verification or a more formal Logo / Certification Program.

Bureau Veritas has been active in testing and inspections since 1828; forward-looking and fast-growing, we have realised a 16% growth per annum since 1995. We are a leading international conformity assessment body with 280,000 clients, 23,000 employees and 700 offices / laboratories in 140 countries.
