

L C I E

LCIE Bureau Veritas EC MARKING

EC marking on a product means that it meets all the essential requirements of the European Directives applicable to it.

It is mandatory and allows the free movement of products throughout the EU territory.

Whether you are a manufacturer or an importer, it is your responsibility to ensure that your products comply with the applicable Directives and Regulations. In addition, you must establish an EU declaration of conformity and keep a technical file available for the authorities.

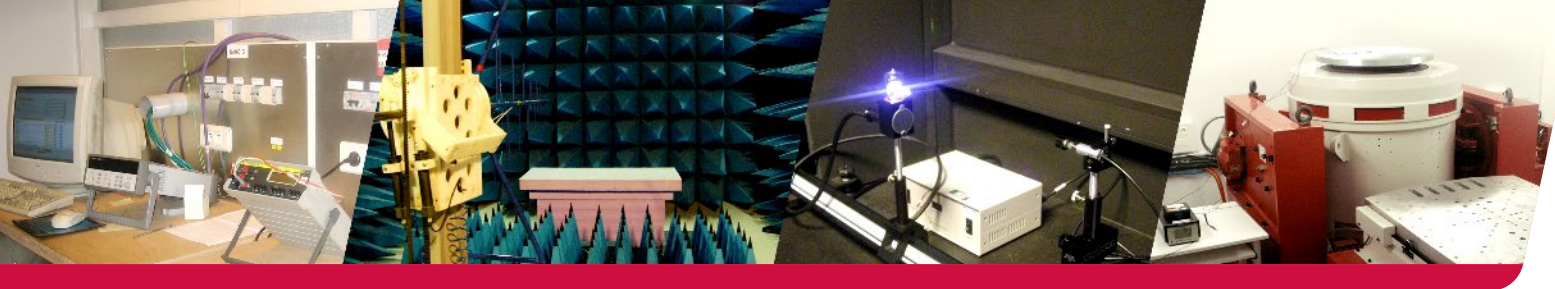

LCIE Bureau Veritas provides you with its laboratories and expertise, and offers you a turnkey solution for the evaluation of your products.

An obligation to market your products in the European market

LCIE Bureau Veritas acts as a **Notified Body** under the number 0081, at all stages of product development.
