# HAZARDOUS SUBSTANCES

*Declare your substances with the hazardous collection and declaration web platform*

## BUSINESS CHALLENGE

European and international regulations require manufacturers to restrict or declare the use of hazardous substances in electrical and electronic equipment. The constant change of the lists of substances and the complexity of the supply chain make the implementation of regulations difficult.

### Your needs:

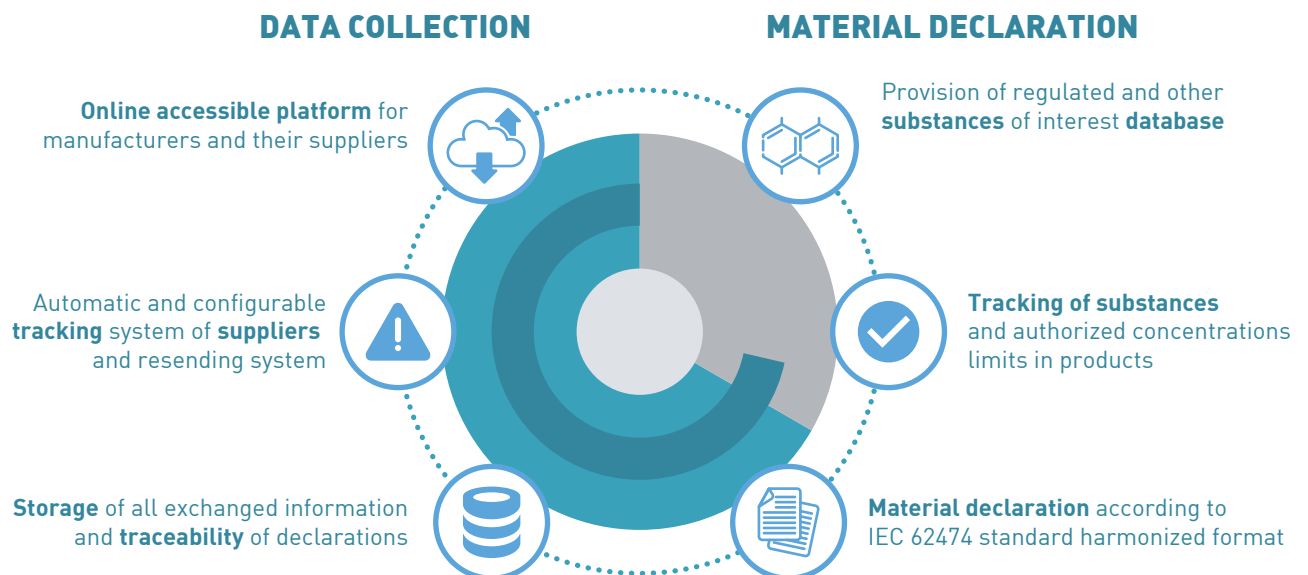

- ✓ Involve your company and your suppliers in a process of tracking hazardous substances according to international regulations and standards in force
- ✓ Meet consumers' and stakeholders' expectations for transparency

### Key points:

- ✓ Identify the presence of hazardous substances in your products
- ✓ Collect, follow in live and store information of your suppliers
- ✓ Have access to an internationally recognized and harmonized format of material declaration for subcontractors, authorities and clients
- ✓ Receive the latest updated lists of hazardous substances

## OUR SOLUTION

LCIE Bureau Veritas has been innovating and offering, in partnership with Bureau Veritas CODDE, the Hazardous Substances Collection and Declaration Web Platform

## ACCESSIBILITY AND MAINTENANCE

- Secured Web application
- Installation and maintenance included
- Continuous improvement, development and updates

## SUPPORT SERVICES

- Updated lists of regulated hazardous substances (REACH, RoHS, J-Moss, China RoHS,...)
- Technical Help Desk provided by experts
- Specific training at all use stages
- User community (Userclub, webinars for new functionalities, ...)

## ADVANCED FEATURES

- XLS import of Bill of Materials
- Development of an interface with other IT supports (on request)

## WHY CHOOSE LCIE BUREAU VERITAS

LCIE Bureau Veritas offers a wide range of solutions for everyone involved in electrical and electronic products: assistance and expertise, testing, certification, audits, inspections and training.

LCIE Bureau Veritas is a premier certification body in Europe and has signed bilateral agreements with its opposite numbers abroad. It provides you with the passports required to conquer global markets, after checking your products for compliance with the applicable standards.

Our services involve :

- ✓ Guidance all along your product life cycle
- ✓ Multidisciplinary skills
- ✓ Recognized technical expertise
- ✓ Third party services, bringing independence and confidentiality
